

Delaware Sea Level Rise Advisory Committee

DRAFT Concept for October Workshop

Target Date: Oct 5

Before workshop:

Advisory Committee finalizes and approves a draft vulnerability assessment for reference in workshop

Advisory Committee drafts and approves goals for each resource or resource group based on vulnerability assessment

Advisory Committee IDs potential adaptation strategy type(s) for each resource

(Retreat; Elevate; Armor and subsets of these)

If time allows, may also determine potential feasibility of each

Advisory Committee provides lists of names and addresses of people to invite

Working draft vulnerability assessment provided to all workshop participants

During workshop

Present exposure data for each resource

Present Adaptation Goal Statements for each resource (sub-chapter)

Present potential adaptation strategies for each resource

Workgroup participants will refine adaptation strategies and/or propose new strategies/gaps.

Workgroup participants will refine or identify feasibility of adaptation strategies

Workgroup participants may begin to identify barriers to implementation of strategies

(Funding, policies, not enough information, public perception, politics)

Outcome

Involvement by larger group of interested persons

Refined Adaptation Strategies

Identification of barriers

Identification of strategy feasibility
